

CARDIFF FUEL TERMINAL

The final push is on to complete the bund relining work in the Cardiff Fuel Terminal. The site team are making great gains in a timely completion of the project following the removal of 5000t of soil. The installation of 80 up to (6t) concrete pipe supports and the installation of nearly 4500m² of RAWMAT bund lining.

FARNBOROUGH DATA CENTRES

The works continue at Farnborough with Larry and his team continuing to assemble data centre building equipment and help our client Blade Room achieve the fast track programme. The work here is expected to continue throughout the spring.

SSSTS
Site Supervisor Safety
Training Scheme

SUPERVISOR TRAINING

Austwel Supervisors will all take part in the CITB Site Supervisor Safety Training Scheme during February 2017. This will reinforce our ability in effective supervision in regard to safety standards and legislative requirements.

EXPLORING NEW CLIENTS AND WORK AREAS

Meetings have been set up for early February with Morgan Sindell (Tier 1 Contractors) and other main contractors in the South West Wales Framework, to explore possible work avenues in Pembrokeshire such as civil engineering works for Welsh Water and other public sector works.

VALERO.... A SAFE AND EXCELLENT FUTURE

The Valero team worked exceptionally hard and helped the Valero Pembroke site achieve the accreditation to the Voluntary Protection Programme.

Well done to all concerned!

EMPLOYEE OF THE MONTH

A voucher to the value of £25 will be awarded to the Austwel employee who achieves excellence in their field of work.

The selection criteria will be 'quality of work standards' and 'attitude to work'.

NEW STARTERS

Dominic Jeary - workshop technician

Josh Stowell - site supervisor in Milford Haven

Chris Hawkins and **Chris Spillaine** joined the Farnborough site team working alongside Larry.

SAFETY AWARD OF THE MONTH

Stuart Power was in a work team that had to remove a Foam line from a fuel storage tank in order to gain access with heavy plant. When said line was removed Stuart noticed that at the lines elbow with the line riser was full of rust/scale and in an emergency would have been useless. Stuart informed me immediately and in turn we informed Operations. Action was taken - we jetted the line out before we reinstalled the line, Operations are undertaking a full inspection of said lines. Terminal Manager commended Stuart & Austwel on our actions.

Stuart received a monetary voucher as a result. We as a company intend running this award scheme on all our sites on a monthly basis.
